

The new ELTECH range of Elastomer Roller for web cleaning and contaminate removal

- Material components, processing and finished products will remain constant – Guaranteed.

The individual components and process specifications have been refined over the past 10 years to ensure the product delivers the most effective cleaning on the market.

Data Sheet 25 hard Roller Elastomer

The 25 hard Elastomer Roller compound has been formulated to conform to irregular surfaces and offer superior cleaning capabilities without contaminating the sub-straights it has contact with

<u>TEST</u>		<u>Typical Value</u>
Density	:	1.07 g/cm
Hardness	:	25 +/- 5
Tensile Strength	:	6.0 Mpa
Elongation @ Break	:	600%
Tear Strength	:	6 kN/m
Colour	:	Blue

Data Sheet 35 hard Roller Elastomer

The 35 hard Elastomer Roller compound has been formulated to offer superior cleaning capabilities for materials that are extremely thin and have a tendency to wrap without contaminating the sub-straights it has contact with.

<u>TEST</u>		<u>Typical Value</u>
Density	:	1.11 g/cm
Hardness	:	35 +/- 5
Tensile Strength	:	8.0 Mpa
Elongation @ Break	:	5000%
Tear Strength	:	11 kN/m
Colour	:	Blue
